- Accessible** 31" above floor
- No leaning/ no stretching
 - No access ramps
- Clean** Dry seals and vent cycle
- No damaged rooms
 - No ruined clothing
 - Use as display lab

- Durable** Marine-grade fiberglass
- No corroded walls
 - No annual rust scraping

- Adaptable** Easy set up
- Icon based programming of complex standards
 - Does almost all test standards including G84 Anx4 SO₂ fog testing

s (standard)

+ (plus)

xp (premium)

Salt Spray Testing

Complies

ASTM B117, etc

- Timed stop
- Hours counter
- 2 line display
- Push button controls

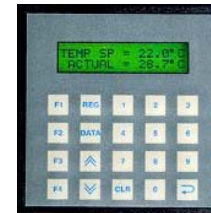

All 's' features + Condensation RH Testing

Complies

All 's' standards and D2247, etc.

- Provides testing for spray, condensation humidity
- Relative humidity display
- 2 line display with Keypad entry

All '+' features with programmed cycles and run-time display

Complies

All salt spray standards;

S – All '+' standards

and ASTM G85 Anx A2,3,4,5;
G85 Anx 4 with SO₂ option

CC – also SAE J2334, GM9540,
many, many more ...

- Multi step testing all machines, cycle between test modes
- *Salt Spray* – Cycle between spray and RH modes
- *CCT* – Automatic cycling between complex test steps, controlled RH testing, fully comply with international cyclic corrosion test standards
- Touch screen control, icon programming graphical display of set point and actual values

Rent / Lease / Lease-to-buy

- Preserve the capital budget
- Protect the P&L from excess capital costs

... and get the chamber of your choice
